What's In Each World?

Each world contains 9 regular levels, 4 challenge levels and 1 unique boss fight.

The 9 regular levels in each world of DYE are a series of challenges with Pigments along the way. Each Pigment you rescue will restore a layer of color, and rescuing all 5 in a level will restore all color to that level. The **Normal Mode** of the level will have checkpoints along the way, while the **Hard Mode** modifier will remove all checkpoints and add additional danger.

The 4 challenge levels in each world of DYE are filled with 100 "dust". You free a Pigment every 20 dust collected. There are no checkpoints in the challenge levels, and the Hard Mode version of these levels adds a restrictive time limit.

I am a gardener so of course I love this game. Nice and easy going with pretty graphics and you learn something! It has the rts element for regular game mode and then the added turn based strategy mode which is a nice change up. Not a super long game, but pretty and fun for the time being. Definitely recommended, and they lowered the price, heck wait for a sale and it will be even cheaper and then definitely try it.. Sickness is an interesting visual novel with disturbing scenes, images and themes. The main character Suoh is mentally ill, violent and probably a sexual deviant. Someone buying this game expecting sunshine and rainbows is going to be disappointed. All of that aside, the game tells a compelling story with a ton of content that has four different paths to take - two good, two bad. The game even has a secret unlockable character that allows the reader to see the same story from another point of view. I enjoyed this game.. Freebie is a timing-based arcade game, where you have to shoot a ball at a spinning little bar to hit it towards the green border and avoiding the red one, there's nothing more to it other than trying to beat your own score in each game.

It's a simplistic game, to be played when you have little free time and want something simple to be entertained, besides, it's cheap.. Amazing, i had heard about this game before and there are no rts left so I thought: \u2665\u2665\u2665\u2665 it, lets try it out. Man am i not disappointed.

On this game you play the space marines campaign. You are a kickass dude who believes in some sort of know it all emperor(i think its like god or something like that).

That said, they are fanatics who do everything in the name of the emperor. Its a nice story. The expansions lets you play with other races.

It feels very good, you need to try it.

Graphics arent good for todays standards but get the wide acreen fix and the zoom out mod and you are all set. After a while you start loving the graphics.

Its a gem, go buy it.. Nice route, cool scenarios and enough options for creating other interesting scenario's.

However, the trains are quite touchy on the controls, you've really got to pick the keys to prevent your train from going into emergency brakes setting. The same goes for applying power.

Another major disappointment is the linkline: It is modelled, you can drive it, but there isn't any scenery. Which is quite too bad because it gives some nice options for creating interesting scenario's. Adding the scenery on the linkline would have added just that much to make it way cooler, now it is a dissapointment driving it.

Would I recommend it at full price? No. I have bought it with some discount, and I like driving it, but it has too much a feeling of a quickie to make fast money.

. very playable, not too hard, not too easy, 38 levels, 11 timed levels, so it can be challenging, but 4-5 hours enough to beat the game. So its ood game for that money!. Please make a sequel to this amazing game

. No. The tutorials arent working, the graphics are slow.

And most important : That is not a simulator, that is an Farming FPS. Lol.

Terrible.. bought this game because i was looking for a basic Paintball game... atm this is really bad, paintball 707 which looks like it runs on cs 1.6 from like 20 years ago is closer to a basic PB game. this games markers shoot all over the place and there is only 1 gun, the AI is bad and who game is just un-organized for helping you understand what basic things you have, why you have them, what to do with them... just kinda sloppy and looks like its made 25 years ago ... sigh ... can't anyone make a damn paintball game without robbing me :V i liked the mod i can use on Counter Strike better then games made decades later ... go fig

A fairly well-written Point-and-Click adventure game with properly thought-out hidden object areas, and excellent voice acting. A wonderfully decent game to be based on the Dracula mythos, that really draws you in.

I highly recommend it to any one who likes vampires, and/or point-&-click games.. A beautifully produced, but very short and especially easy casual point-and-click adventure.

There are only a few simple hidden-object scenes, and the puzzle mini-games are almost trivial, but the delightful graphics, music, and voice acting overcome these flaws to provide for a pleasant couple of hours. Those seeking a "real" hidden-object challenge should look elsewhere, but if you don't feel like taxing your brain too much, this is a nice once.

Thank you, devs, for supporting Linux!. Really enjoyed this game! Great storyline, supported by original soundtrack and sound effects. The levels are beautifully crafted and the controls are simple and precise. Well done to the devs - superb effort!!. Not worth the aggravation at any price point. It's a very basic match 3 with a RPG "skin" and a few usable items to affect the play field, your "enemy" doesn't even make any moves they just attack you if you match the wrong kind of gems.

Main problem is this game is not stable, every 10-15 minutes the game will freeze or crash to desktop, seem to happen in both windowed mode and full screen mode. Maybe it work better on some systems, guess it's an older game but judging by the forums I'm not the only one with this issue, ultimately the game is not worth trying to figure out what the problem is for me at least, I'll just refund it myself before I pass the 2 hour mark. So would not recommend it.. I love this software so much!!! It has tons of possibility and functionality, and professional tools from effects to templates. For this kind of price, it totally worth it!

Just one little thing that makes this software kinda lack of something, that it neither can export nor import .srt files, but it still can create built-in video subtitle.

Totally recommended!. Her name is based on the initials of "Idea Factory", the parent company of Compile Heart. IF has a total of nine cellphones. She has only been seen using the pink one. IF's nine cellphones are titled: Otomate Forte Blue-Green, B Make Sky Blue, IF Neverland Navy, Gene Project Black, IF Mate Rose Pink, Type Zero White, Happy Seed Yellow-Green, Otomate Orange-Pink, and Lupinus Sugar Pink. The one she uses the most is IF Mate Rose Pink. IF is extremely dependent on her phone, as shown when she degenerates into a blubbering mess in Re;Birth2 after a random passerby accidentally bumps into her and breaks her phone. She cries whenever her phone breaks. Maybe I'm IF herself.
