This game is a classic. When my wife starts playing this I have to beg her for my computer back. It's fun, challenging, and addicting. Great game to kill time when you don't have enough of it to play a real game.. Display options are not changable, and support is a joke on this. Will not play on modern monitors correctly due to scaling.. Ok game

Has few bugs but can be ignored(but need to be fixed)

Not many people play this game, I 1v1'd for the 10 minutes i played this game. It was good, but not as good as others have played from Artifex Mundi. Had some problems with the way they do audio and had to remove some kernel sound modules because it was causing confusion for them. The game seemed a little shorter than the others. This is the first one of the series played so can't comment on them. It was more like playing a movie with a little interaction. Not as many HOG or puzzles as some of the other games from them have played. Also much easier to solve. First time never had to resort to youtube to solve one. Not bad, but not real good either.. This game was the complete opposite of what I thought it would be. It doesn't last more than a few minutes per run and it's really not that greatly written.. Nice little arcade game, dev is very good about supporting and updating the game so far. Worth the price for some sheield throwing action.. I love this game, it makes me remember a tank game on Wii. I wasn't sure to buy this game. I looked only on pictures at the shop page and i thought it may be interesting. I bought it and what? I got a amazing game with addictive gameplay and very interesting sometimes funny story.

Stages require from you a lot of skill and thinking.

The creators have done a very good job. I recommend it if you want to spend many hours having fun :)

Edit. Music... Amazing job.

refill lost health. . . - There doesn't seem to be any ability to change controls from within the game or to view the default controls. Some of the controls are listed once you load into the game but the rest you get a crash course in figuring out. For example, we didn't find out that there was a way to sprint/run until 3 hours into the game (it's the "shift" key, by the way. Pretty standard I guess but still would have been nice to know)

- In Co-Op there's no round counter on the top right of the screen for the person not hosting the game

- There's only 1 map and it's tiny. There's also no real substance to the map, it feels and looks very empty for a "laboratory"

Overall, I recommend the game for a bit of fun. The game has replayability due to the nature of endless wave based games but looking at the same monster model for too long will become stale. My dad and I picked this up on a steam sale for 50 cents (\$1 total) and got our money's worth out of it. The general verdict is that you get what you pay for.. I'm not really good with words, but this is a really wonderful game y'all, and everyone should play it. It's completely worth the price of admission, and I sincerely wish this developer the best for this game and any games that follow.. If it's not already obvious from the title this is a walking simulator with light puzzles and a massive superiority complex. It start off seemingly trying to tell three stories at once (that of the player character's journey: something about ♥♥♥♥ing pirates on a secret island plus a conversation between two parents about their sick child) via the ever-so subtle mechanism of 'having chunks of dialogue just ♥♥♥♥ing floating there right in front of you at random as you move around the level'. It very quickly gets pared down without explanation to the main story of the parents at which point it becomes exactly the kind of thing you've see loads of times before and done much better. The graphics are nice enough in places but the whole thing has a general low quality feel to it and the levels aren't coherent interesting places to explore, just random stuff thrown in to lead you from one bit of floating text to the next. Oh, and there's a 'run' button which increases your walking pace and there's never any reason not to use it so you just end up♥♥♥♥♥♥♥♥off at having to hold it down for literally the entire game.. VEEERRRYYYY simple sudoku game, as you can see in the store screenshots. Is it worth AU\$1.50... naaaaaahhhhhhhh
